SATISFIED CUSTOMERS WHO KNOW SAY —

"Our collection offers the best in quality"

We are pleased to present you with our catalog for 1962 which contains many of our fine stud plants and hundreds of new hybrid seedlings that will produce quality flowers.

The outstanding stud plants that were used to produce the seedlings we are now offering have been in demand by commercial growers the world over. Many of the stud plants found listed under "Choice Plants" in this catalog have not been listed for several years. These plants are not remade crosses but are divisions of the actual plants we have used for breeding.

Also for the first time in many years we are listing our outstanding collection of Trianaes.

We have additional crosses of many hundreds of seedlings that are not listed in this catalog. Should you desire types not listed please write us as it may be possible that we can supply you with those items.

The same is true for the listing of our botanicals. We have many sources of supply and we will endeavor to acquire for you any specie we do not list in this catalog.

This firm has been known for many years as one of the world's leading producers of quality orchids, attested by thousands of letters we have received from satisfied amateur growers and connoisseurs alike.

If at any time you are in our area please stop in and meet us personally.

NON-WARRANTY

Because growing conditions and cultural methods are not the same in every locality, we — R. H. GORE - ORCHIDS — give no warranty, express or implied, as to the productiveness of any of the plants we sell and will not be in any way responsible for the crop. Our liability is limited to the purchase price of plants. All prices listed in our catalog are F. O. B. Fort Lauderdale, Florida.

GROWING SUPPLIES

We have the distributorship here in South Florida for Silvabark. This bark comes in three different grades — fine, medium and coarse, and is by far the most outstanding medium we have ever used. A two-cubic foot bag retails for \$4.50. Discount prices will be given on quantity lots upon inquiry. We also sell trial bags at \$1.00.

We also handle Mexican tree fern in two-cubic foot boxes, fine, coarse and chunks, at \$5.00 a box. Mexican fern logs, 40" long, round and square, sell for \$4.50. Mexican fern plaques, 6" diameter, round and square, sell for 50c.

We have a complete line of growing supplies, including clay pots, redwood slat baskets, fertilizers and insecticides.

Clamps — .50 per doz. Stakes (fasten on side of pot) 1.00 per doz.

Single hangers — .20 ea. or 1.85 for 10

Double hangers — .35 ea. or 3.25 for 10

CARE OF ORCHIDS IN THE HOME

Location—

Place the orchid plant near a window or under a tree, giving it as much light as possible. Do not let the sun shine on the plant except early morning or late afternoon.

Watering—

Pot water the plant heavily by filling the pot completely once a week. During the hot summer months give a light spray over the leaves daily. During the cool winter months apply a light spray over the leaves about twice a week.

Temperature—

Cattleya plants like "comfortable living" home temperatures.

Humidity—

If plants are grown indoors where there may be heat, the pot can be placed in a tray containing gravel or small pebbles. Keep some water in the tray with the water level being constantly below the bottom of the pot.

Repotting—

Plants should be repotted on an average of every two years, or when the plant starts growing outside the pot. We will repot your orchid for a slight nominal fee when needed.
